PROFESSIONAL SUMMARY

Computer Science graduate building a career in DevOps and Cloud Engineering through hands-on projects and practical labs. Experienced with Docker, Docker Compose, Linux, Git, PostgreSQL, AWS, and application deployment, while expanding skills in CI/CD, Kubernetes, and Terraform. Strong interest in automation, troubleshooting, and reliable infrastructure, seeking an entry-level DevOps/Cloud Engineering role.

TECHNICAL SKILLS

Operating Systems: Linux (RHEL, Ubuntu), Windows

Cloud & Infrastructure: AWS, EC2, VPC, IAM, S3, EBS, RDS, Route 53, Elastic Load Balancing, Autoscaling, ALB, Security Groups, CloudWatch, ECR, ECS, EKS, Lambda

Containers & Orchestration: Docker, Kubernetes

Version Control: Git, Github

CI/CD & Automation: Jenkins, ArgoCD

Infrastructure as Code: Terraform

Monitoring & Observability: Prometheus, Grafana

PROJECTS

High-Availability Cloud Architecture & Automated CI/CD Engine

[Link](#)

AWS, Docker, Jenkins, SonarQube, Trivy, Nexus

- Engineered a **3-tier, multi-AZ architecture on AWS** with **ALB**-based traffic routing, Nginx presentation layer, **Multi-AZ RDS MySQL** database with synchronous standby failover.
- Built a **Jenkins CI/CD Pipeline** with **SonarQube**(Code quality gate), **Trivy**(CVE scanning), and **Nexus** Integration, with **real-time build status** notifications on Teams/Discord/Slack for instant pipeline visibility.

Microservices CI/CD Pipeline on AWS with Infrastructure as Code

[Link](#)

AWS, Docker, Jenkins, Terraform, SonarQube, Trivy, Nexus, ArgoCD, Kubernetes

- Architected a **multi-AZ Node.js** microservices cash-mangement platform on AWS with **ALB**-based service routing, **Multi-AZ RDS MySQL** database, and **Terraform** IaC, reducing infrastructure provisioning time by **~80%**.
- Built a security-gated **Jenkins CI/CD Pipeline** (SonarQube, Trivy, Nexus), and **GitOps**-based deployment to Kubernetes/Minikube Cluster via ArgoCD, reducing deployment time by **~70%** and enabling **< 2 min** rollbacks.
- Integrated **real-time build notifications** (Teams/Discord/Slack) on every pipeline run, providing instant visibility into **build success/failure**, deployment status, and failed stage details to the selected notification platform.

EDUCATION

B.E. in Computer Science & Engineering — 8.33

2021 — 2025

SAL Institute of Technology and Engineering Research

 WORK EXPERIENCE

- Web Developer Intern

Grownited Private Limited • Ahmedabad, India

JAN 2025 — APRIL 2025
- Developed an **e-commerce application** using **HTML, CSS, Bootstrap, JavaScript, Spring Boot, and MySQL**.
 - Built responsive frontend components and integrated them with **Spring Boot REST APIs** and MySQL database services.
 - Gained practical understanding of **application architecture, backend services, databases, and deployment requirements**, supporting my transition toward DevOps and Cloud Engineering.
